Go High Level,
HTML, JavaScript, jQuery, CSS

Profile

Results-driven web specialist with over 10 years of experience in front-end and back-end development, content management systems, and digital automation. Adept at optimizing online presence through responsive design, scalable architecture, and seamless user experiences. Proficient in HTML, CSS3, Bootstrap, JavaScript, PHP, SASS, GIT, and open-source platforms, with a strong grasp of object-oriented programming in C#, .NET, and API integrations. Skilled in database management and custom development to deliver high-performance web solutions. As a Go HighLevel Certified Admin, I implemented CRM workflows, automated lead pipelines, and designed branded onboarding systems that enhanced client engagement and operational efficiency.

Experience

June 2021 - Present
Full Stack Web Developer • Betechky Web Solution & Design •
Winnipeg MB, Canada

- As a certified Go HighLevel Admin, I designed and implemented automated workflows that streamlined client communications, lead nurturing, and service delivery. I configured CRM systems with custom triggers, pipelines, and branded onboarding sequences to improve operational efficiency and elevate the customer experience.
- Communicated with clients to understand their website goals, target audiences, and design preferences. Gathered requirements and converted mockups into functional web solutions.
- Translated design concepts into responsive, interactive web pages using HTML, CSS, and JavaScript. Ensured cross-browser compatibility, accessibility, and optimized performance across devices.
- Assisted clients in managing and updating website content—text, images, videos—and set up CMS platforms like WordPress or developed custom CMS solutions.
- Provided ongoing support by troubleshooting issues, fixing bugs, and applying updates and security patches. Monitored
